SUMMARY

Enthusiastic and innovative Junior Front-End Web Engineer with a foundational understanding of the latest web technologies, including React framework. Adept at crafting responsive user interfaces with HTML5, CSS3, and modern JavaScript (ES6+), while utilizing tools like Webpack for efficient workflow management. Eager to apply my skills in a dynamic team environment to contribute to impactful web applications, continuously learn and grow within the field, and stay abreast of cutting-edge technologies like server-side rendering and progressive web apps. Committed to writing clean, maintainable code and delivering an exceptional user experience.

PROJECTS

EcoBites

Cape Town, SA

Develop the frontend of the marketplace using HTML, CSS, and JavaScript frameworks (e.g., React.js) integrated with Rails using tools like web packer.

- Achieved personal and professional growth by identifying and resolving {100+} challenges, enhancing future project delivery.

GameOn

Cape Town, SA

Integrating third-party services and APIs such as Mapbox to demonstrate the app's potential to provide a seamless user experience.

- Achieved functional prototype, enhancing product development by translating requirements into a tangible model.
